

SuccessWare 7.1 Release Notes

Released: December 4, 2018

Systems No Longer Supported

- Systems prior to Windows 7 Service Pack 1 are no longer supported.
- Mac OS X systems prior to version 10.11.6 are no longer supported.

Known Issues

- On Mac OS X 10.14 "Mojave," creating a new sync account does not work because the window that appears to ask for your Google account credentials is blank. If you are running Mojave, contact support and we will create the new account for you. This issue will be resolved in SuccessWare 8.0.
- On Mac OS X 10.14 "Mojave," The Trend Analysis reports are empty. If you are running Mojave, contact support and we will run the report for you. This issue will be resolved in SuccessWare 8.0.

Enhancements

- Added support for the new 64-bit SuccessWare 8.0 (coming soon!).
- Added support for PayJunction Smart Terminals which allow you to accept chip credit cards.
- Added social media links for clients, relations and prospects.
- Added the ability to insert session start time on emails from orders.
- Added inflow and outflow columns on account reconcile window.
- Added inflow and outflow columns on account listings.

Resolved Issues

- Events now appear in time order on days within the scheduler month view.
- Expense item descriptions are now included when importing expenses.
- Fixed auto emailing when the attached html file is not available.
- Fixed an erroneous "print statements?" query when printing certain order forms.
- Confirmation checkmarks now appear properly in the month view no matter the color of their associated events.
